

After taking the learning style quiz, I was somewhat surprised with my results. I thought I was more of a visual learner, however the quiz proved otherwise. When I think about it, it makes sense. I think that the weekly videos are very beneficial for me, especially incorporating audio and visual stimulation!

What's Your Learning Style? The Results

Your Scores:

[Printer Friendly Version](#)

- Auditory: 55%
- Visual: 35%
- Tactile: 10%

You are an **Auditory** learner! Check out the information below, or [view all of the learning styles](#).

Auditory

If you are an auditory learner, you learn by hearing and listening. You understand and remember things you have heard. You store information by the way it sounds, and you have an easier time understanding spoken instructions than written ones. You often learn by reading out loud because you have to hear it or speak it in order to know it.

As an auditory learner, you probably hum or talk to yourself or others if you become bored. People may think you are not paying attention, even though you may be hearing and understanding everything being said.

Here are some things that auditory learners like you can do to learn better.

- Sit where you can hear.
- Have your hearing checked on a regular basis.
- Use flashcards to learn new words; read them out loud.
- Read stories, assignments, or directions out loud.
- Record yourself spelling words and then listen to the recording.
- Have test questions read to you out loud.
- Study new material by reading it out loud.

Remember that you need to **hear** things, not just see things, in order to learn well.
